

Mehmet Ali KÖKPINAR

Dr. Mehmet Ali Kökpınar obtained his PhD (1996), MSc (1990) and BSc (1988) degrees in Civil Engineering from Middle East Technical University (METU), Ankara-Turkey. Since 2006, he is an Associate Professor in Hydraulics. He worked for General Directorate of State Hydraulic Works, Turkey, between 1997 and 2016. His research interests include air-water flow in hydraulic structures, sediment transport and local scour, sediment transport in pipes, reservoir sedimentation and design of hydraulic structures. His international publications include more than 30 journal and conference papers. He is an individual member of IAHR (International Association of Hydro-Environment Engineering and Research) and served as a member for two terms (2010-2011 and 2012-2013) in the IAHR-Europe Leadership Team. Dr. Kökpınar took part in the organization of many international and national scientific conferences including IAHR-supported River Flow 2008 Conference in İzmir-Turkey, UNESCO-supported Sediment Transport Technology Summer Course Series in Ankara and Istanbul, and 1st, 2nd, 3rd, 4th and 5th National Water Engineering Symposiums held in İzmir and Istanbul.
